

WALL SCONCE INSTALLATION INSTRUCTIONS

WARNING To prevent electrical shock, turn off power before beginning installation.

STEP 1 Turn off power before beginning installation.

STEP 2 Thread 2 screws (provided) into adapter bracket.

STEP 3 Connect wires to power supply and ground leads with wire nuts (provided), placing wire junctions with wire nuts inside junction box.

STEP 4 Attach adapter bracket to junction box with 2 screws (provided by others), with screws protruding toward light fixture.

STEP 5 Mount fixture on screws in adapter bracket with 2 battery nuts (provided).

STEP 6 Install lamp. Turn on power.

NOTE Protective film on some brass units must be removed prior to installation.
Fluorescent fixtures: Replace lamp with 13WF13TT, PL-13 or DULUX13 only. Replace ballast with Halo part BL-274 Type I outdoor ballast only.

CAUTION Do not exceed maximum wattage indicated on fixture.
